

## ENPC Version 5 Course Information

It is critical for you to understand that this course is a completely revamped version of ENPC that provides an engaging learning experience designed to enhance your ability to care for the pediatric patient. The model for this course requires a pre-course time commitment of approx. 13 hours. Please make sure you will be able to achieve this goal prior to registration for this course.

Once I receive your registration information and payment, you will be entered into the ENA data base and will receive an email from them to complete your online registration.

You will be required to complete 12 online modules PRIOR to attending the course. The modules take a minimum of approx. 5 hours to complete. You will need to bring your completed certificate to the first day of class. **Failure to do so will disqualify you from attending the course.**

Additionally you will be expected to have reviewed your provider manual which takes a minimum of approx. 8 hours as there will be no classroom lectures. The entire in class course will be hands on and participation which each student will be expected to accomplish for successful course completion. Skills stations will be practiced on the 1st day and then tested on the 2<sup>nd</sup> day.

The 50 question multiple choice exam will be open book and online and **MUST** be completed within 7 days of the 2<sup>nd</sup> day of class. If you are unsuccessful in passing, you will be given an opportunity to review your answers and then attempt the exam for 2<sup>nd</sup> time. A 2<sup>nd</sup> attempt **must also be completed within 7 days of the 2<sup>nd</sup> day of class.** The exam is timed for 2 hours maximum. After that time, the test is closed and graded. Please make sure you allow uninterrupted time for the exam as you will not be able to stop and restart the exam.

The course was developed in response to many participants who wanted less lectures and more interactive activities. This is an exciting interactive format that I am hoping you will enjoy as you engage with instructors to improve your pediatric knowledge base and skills.

Please contact me for any questions.
